PROCEDURES WHEN ORDERING FROZEN AND CHILLED SEMEN 2017

Choosing artificial insemination to breed your mare is just one of your choices to be made but what happens when you have to order the semen? The following guidelines have been designed for the client to understand how your order will be handled and what you, as the client will be expected to do. To start the procedure firstly, if applicable you must inform your vet so that he/she can carry out a pre-breeding assessment of your mare to insure that artificial insemination with frozen or chilled semen is a viable option. Secondly you are required to complete the order form and return it to Luidam accompanied with full payment **PRIOR** to dispatch of the semen.

All of our semen is based at a main storage facility in Whitchurch, Shropshire in the UK. You will have three chances at getting your mare in foal and should she not be in foal by October 1st of that breeding year, then you will have a further three chances the following season, as long as she has been inseminated three times. The nominations are non transferable and can only apply to the mare for which they were accepted. Under extremely special circumstances and by prior agreement only, this term may be waived. It is important that our office receive the semen order forms in advance of when you plan on breeding so that it can be processed and payment cleared **PRIOR** to semen being dispatched to the insemination site or veterinary practice. It is also important you ensure your vet has insurance which will cover the storage of your semen as it will no longer be covered by our insurance once it reaches its destination. This is something to be aware of should a flask accidentally run dry of liquid nitrogen or some accident occur rendering the semen useless. Only one covering certificate per semen purchase will be issued, unless prior agreement has been sought. **Under no circumstances will retrospective covering certificates be issued.**

Your Semen purchase only entitles you to one pregnancy and all unused straws remain the property of Luidam and should be stored in the standard manner and conditions to maintain their life cycle until such times as they may be collected for reuse. Often if you have residual doses, an agreement can be reached to purchase these straws for another insemination at a slightly reduced rate, this arrangement can not be retrospective, any retrospective requests will be denied and recompense will be sought, please contact us for further information.

Luidam can not be held responsible for any consequential losses for your mare not becoming pregnant for any reason.

Ordering Frozen Semen

- Orders must be placed before 11 am and with at least 24 hrs prior notice for next day delivery. Our standard distribution service does not operate on a Saturday or Sunday. To avoid semen being held over by the couriers deliveries are made Tuesday- Friday. Luidam, whilst endeavouring to use the best courier facilities available, cannot be held responsible for their services.
- Once semen has been dispatched Luidam cannot take any responsibility. Please insure your vet has insurance once it reaches its destination. This is something to be aware should a flask run accidentally dry of liquid nitrogen or some accident occur rendering

the semen useless.

- **Delivery will be charged at £153.00 for standard mainland UK delivery service, which includes a 7 day flask rental.** The delivery will comprise two doses. If the flask is not returned within the hire agreement terms there will be additional hire charges payable by the semen purchaser, until the flask is returned. Covering certification will not be issued until it is confirmed that the flask has been returned and all additional charges cleared. Luidam, whilst endeavouring to use the best courier facilities available, cannot be held responsible for their services.
- Budget figures for EC countries are £500.00 by road and 550.00 by air to give you some idea for EC Deliveries. These figures are for guidance only.
- Standard delivery times to UK mainland is next working day and to EC countries can be 10 working days.
- Health certificates and export documentation can take up to 10 working days and then shipping times have to be added to this.
- Please allow plenty of time for your delivery! With frozen semen there is no excuse.
- If you incur any problems at any stage please contact us immediately and we will do all we can to help.

Export

- Delivery charges vary from country to country and speed of service please contact us directly for a quote for your EC delivery
- Semen export standard certification is applicable to all EC countries, including Southern Ireland but not Northern Ireland and carries a charge of £85.00 plus VAT per certificate.

Ordering Chilled Semen (Very limited)

- Orders should be made in advance and notification for collection and dispatch of the semen must be placed between 8.30–9.00 am at the latest **NO LATER** and with at least 24 hrs prior notice for next day delivery. If your order is to be delivered by courier from the continent (not by air) we require at least 48hrs prior notice.
- Please take into account that for shipping chilled semen a government veterinarian requires up to and over 24 hrs notice to complete export papers.
- Once the semen has been dispatched Luidam cannot hold any responsibility.
- Be prepared to cover a handling fee charged by the airport cargo department of £35 and

they may require a form of Personal Identification.

- Allow for at least 1 hrs clearance after flight arrival time.
- The client must arrange collection of the chilled semen from the airport.
- A Courier can be arranged to collect your semen from the airport and deliver to your place of insemination. However Luidam will hold no responsibility if this option is chosen and you will be charged for transportation which will also include an extra charge if the courier has to wait for your shipment to clear, once at the airport. (These charges can be very considerable).
- Please contact us for a quote.
- Flight times cannot be guaranteed. Flights can and will be delayed especially through the peak times of the holidays season. We suggest that you check your flight arrival times.
- Flights with deliveries can be from 1400 hrs onwards. At peak time's semen will often land between 1800 hrs and 2100 hrs but it can be later!
- Be aware that your semen may not be available on the date you require the semen due to unforeseen circumstances, i.e. always have a second choice when ordering, or be prepared to accept frozen semen. You may also make a personal choice to allow your mare to miss a cycle.
- If you incur any problems, at any stage, please contact us immediately and we will do our best to help.
- Please remember that we are dealing with live animals unfortunately sometimes, unexpected problems can and will occur.

Pregnancy Diagnosis

- When your mare achieves a pregnancy – Fantastic! Following October 1st we will issue you with a covering certificate.
- If your mare unfortunately does not receive a pregnancy after three inseminations by October 1st and on return of your insemination certificate by your Vet we will issue confirmation of your semen availability for the following season (distribution, certification and equitainer charges will apply and must be paid prior to despatch).
- We will do all we can to obtain these certificates from the vets however it is not always possible and we may need your assistance!!

- If your mare achieves a pregnancy by the 1st of October but does not achieve a live foal, please contact us to discuss the options. Luidam would be sympathetic to your problem and would like to arrange another covering at a preferential rate.

Please Sign to confirm you understand Luidams procedures when ordering semen and return it to Luidam with your order. Luidam will return a copy back to you counter signed.
